## Technical Data Sheet

### Keywalnut

Walnut Shell is a natural abrasive made from the kernel of a walnut. Walnut shell is used where minimal damage is required to the substrate. It can be used on many different substrates and also where it is used at low pressures it can be recycled.

It is one of the few abrasives that can be combusted after use and also is a purely natural product.

### Grade

KeyWalnut1 8/16

KeyWalnut2 25/52

KeyWalnut3 16/5

KeyWalnut4 16/30

Packed in 20 kilo paper bags shrinkwrapped on pallets.  
Single 20 kilo bags also available.

Hardness ; 3.0 - 4.0 mohs

Bulk density; 450 – 650 kgs /dm<sup>3</sup>

**\* CONTAINS TRACES OF NUTS**
