## Technical Data Sheet

### Key Glass

Glass grit is an abrasive produced from recycled container glass, and as such may contain trace particles of materials that are not glass.

Glass grit is generally used as an all round expendable abrasive for cleaning various substrates. Care should be taken when using on substrates not being coated due to particle embedment of the glass “colouring” the substrate.

Grade	Particle size - Microns
Keyglass1 - Ultrafine	000 - 200
Keyglass2 - Fine	200 - 500
Keyglass3 - Medium	500 - 1000
Keyglass4 - Coarse	1000 - 3000

Packed in 25 kilo plastic bags shrink wrapped on pallets.

Single 25 kilo bags also available.

Hardness ; 5.0 - 6.0 mohs

Produced to British Standard PAS 102. Under ISO 9001 quality control systems
