Technical Data Sheet

Keymet

Chilled Iron is a metallic cast iron granular abrasive produced by crushing iron shot to various sizes.

Chilled iron is generally used for producing a profile on steel substrates. It is best used in blast rooms where it can be recycled efficiently.

Grade	Particle size - Microns
Keymet07	180 - 420
Keymet12	300 - 710
Keymet17	420 - 850
Keymet24	600 - 1000
Keymet34	850 - 1200
keymet39	

Packed in 25 kilo polypropylene bags shrinkwrapped 1 tonnes per pallet.

Single 25 kilo bags also available.

Hardness ; Greater than 57 Rockwell C
