Technical Data Sheet – Corn Cob

Corn is a natural abrasive manufactured from grinding and sifting corn cobs. Corn is used where minimal damage is required to the substrate.

It is one of the few abrasives that can be combusted after use and is a purely natural product.

Example of use is degreasing metals.

Product is packed in 20kg bags

Tariff Code 10 05 90 00 90

Contains Nuts

Chemical Composition

Corn Cob 100%

Physical Properties

Physical state	Angled
Odour	Odorless
Explosion Limits (%)	
Flash point:	N/A
Solubility in water (kg/m ³)	Insoluble
Bulk Density (kgs/dm ³)	435-510
Moisture content	12%

Grade Sizes

Walnut Shell	mm
KeyCorn1	0.18-0.4
Keycorn2	0.4 - 0.8
Keycorn3	1.1-1.5
Keycorn4	1.5-2.0
Keycorn5	2-3
