Technical Data

Sinter Grit

Sintered or Calcined Bauxite

A angular grit abrasives made from bauxite, a clay – like ore of hydrated aluminium oxide, are often used as alternatives to aluminium oxide because they are cheaper. The abrasive is produced by heat-treating natural bauxite without melting and fusing it (as in the manufacture of aluminium oxide)

Promotional Sinter ball - expendable

Grade	Particle size	
Sintergrit1	20/60	0.25 - 0.85mm
Sintergrit2	30/70	0.2 - 0.6mm
Sintergrit3	120/180	0.076 - 0.12mm

Packed in 25 kilo plastic bags shrink wrapped on pallets.
Single 25 kilo bags also available.

Tariff Code; 2818109900
